To Whom It May Concern,

Letter of Recommendation for Akinyemi Fiyinfoluwa

It is my distinct pleasure to write this letter of recommendation for Akinyemi Fiyinfoluwa, who completed an intensive industrial training placement with our engineering team at UnoTelos Limited from July 2026 through October 2026. Throughout his tenure, Fiyinfoluwa consistently proved himself to be a driven, technically rigorous, and exceptionally competent engineering intern.

During his internship, Fiyinfoluwa was directly involved in enterprise IoT device deployment and cellular gateway connection. He demonstrated a remarkable grasp of both hardware architecture and network infrastructure, rapidly mastering field gateway configuration protocols . A standout example of his technical capability and initiative was his development of an automated threat intelligence verification tool. Leveraging Python, multi-threaded DNS lookups, and headless browser automation, Fiyinfoluwa designed a robust audit pipeline to cross-examine carrier IP subnets against Spamhaus DQS and Cisco Talos reputation databases. This tool streamlined our IP Reputation validation workflow, eliminating tedious manual audits and demonstrating an engineering maturity well beyond expectations for an undergraduate intern.

In addition to his strong technical repertoire, Fiyinfoluwa exhibited exemplary professionalism, collaborative focus, and clear technical communication.

I recommend Akinyemi Fiyinfoluwa with the highest confidence for any future engineering role, advanced academic pursuit, or technical endeavor. He possesses the drive, intellect, and practical foundation to make an immediate impact.

Please do not hesitate to contact our office should you require any additional information.

Sincerely,

Landy Ezeoma
IoT Engineer
